

# Ultrasound Course for Beginners

Friday 4th December 2020

## A 1-Day Course Suitable for FY, CT & ST3 Trainees

Physics for ultrasound, teaching techniques for ultrasound scanning and the following blocks

- 1) Fascia iliac block # analgesia for #NOF
- 2) Supraclavicular Brachial plexus block # analgesia for hand and shoulder surgery
- 3) Popliteal block # analgesia for ankle and lower leg
- 4) TAP block # analgesia for C-Sections and lower Abdominal surgeries
- 5) Rectus sheath block # analgesia for abdominal surgeries
- 6) Erector spinae block # analgesia for rib fractures

These blocks are useful in day to day practice for post-operative pain management.

Some of these blocks like Fascia iliac and Erector spinae can be useful to non-anaesthetic specialities like A@E.
